# Table of Contents

	<b>Page</b>
<b>1. The Minnesota Model of Large Introductory Courses</b>	<b>1</b>
Flow Chart of Minnesota Model . . . . .	3
Description of Minnesota Model . . . . .	4
<b>2. Teaching Problem Solving</b>	<b>17</b>
A Logical Problem-solving Strategy . . . . .	19
Flow-charts of the Problem-solving Strategy . . . . .	26
Blank Problem-solving Format Sheets . . . . .	32
Grading Feedback . . . . .	34
<b>3. Cooperative Group Problem Solving in Discussion Sections</b>	<b>37</b>
Why Cooperative Group Problem Solving? . . . . .	39
Frequently Asked Questions (FAQ) about Cooperative Groups . . . . .	40
General Plan for Teaching a Discussion Section . . . . .	43
Chart of Group Roles . . . . .	48
Group Functioning Evaluation . . . . .	49
Typical Objections to Cooperative Groups . . . . .	50
<b>4. Context-rich Written Problems</b>	<b>53</b>
What Are Context Rich Problems? . . . . .	55
What Are the Characteristics of a Good Group Problem? . . . . .	55
Twenty-one Characteristics That Can Make a Problem Difficult . . . . .	55
How to Create Context-rich Problems . . . . .	57
How to Judge If a Problem is a Good Group Problem . . . . .	58
Context-rich Problems in This Booklet . . . . .	60
<b>5. Problem-solving Laboratories</b>	<b>117</b>
Frequently Asked Questions (FAQ) about our Problem-solving Labs . . . . .	119
Comparisons of Different Types of Labs . . . . .	125
General Plan for Teaching a Laboratory Section . . . . .	126
Table of Contents for Calculus-Based Introductory Labs . . . . .	132
Laboratory Manual's Introduction to Problem-solving Labs . . . . .	137
Example of Adapting a Textbook Problem:	
Laboratory Manual's Introduction to Forces Lab . . . . .	147
Enhanced Version of Problem #2: Forces in Equilibrium . . . . .	148
Instructor's Guide to Forces Labs . . . . .	153
Example of Exploratory Problem: Magnets and Moving Charge . . . . .	160
Example of Importance of Predictions: Gravitational Force on the Electron . . . . .	163
<b>6. References</b>	<b>169</b>
Cooperative Group Problem Solving at the University of Minnesota . . . . .	171
A Short Bibliography of Articles and Books About Cooperative Grouping . . . . .	172

## Acknowledgments

The authors would like to thank the many people who have contributed to the development of the problem-solving strategy, context-rich problems, the lab problems, and the appendices, especially

Jennifer Blue  
Dave Demuth  
James Flatten  
Andrew Ferstl  
Tom Foster

Andrew Kuntz  
Charles Henderson  
Mark Hollabaugh  
Ron Keith†  
Dan Lottis

Konrad Mauersberger  
Laura McCullough  
Bruce Palmquist  
Julia Stephen  
Jaena Streets

And the physics faculty and graduate students who helped write the laboratory and context-rich problems and helped refine these techniques.

Patricia Heller  
Kenneth Heller
